

AGROMĚŘÍN GROUP

2017|2018

*We do the ,traditional‘
in a different way.*

Agricultural group producing premium-quality domestic foodstuffs

The AGROMĚŘÍN Group consists of the maternal company AGRO – Měřín, a.s., its subsidiary companies and other entities with interlinked ownership. With consolidated annual revenue of 3 billion Czech crowns, the AGROMĚŘÍN Group holds an important position in the farming and food industry of the Czech Republic and has been built on the Czech capital.

The AGROMĚŘÍN Group has as its object the complete agricultural production and the after-treatment of the primary agricultural commodities within the food production in order to provide the customers in the Czech Republic with the wholesome foods produced according to the traditional recipes and using the modern technology.

The AGROMĚŘÍN Group provides over 1,300 job posts mainly in the rural areas, and thereby contributes to maintaining employment in those regions of the Czech Republic. The quality certification ISO 9001 established from the agricultural production over the commodities processing to the food production and the certification GLOBAL GAP or BRC serve as a proof for the quality and production safety compliance.

AGRICULTURAL PRODUCTION

AGROMĚŘÍN focuses on the maintenance of the animal husbandry on the territory of the Czech Republic, mainly dairy farming, cattle farming for beef production and pig farming, with the use of our own plant production that guarantees the needed stability in the production of the feedstuff.

To the plant production belong also the production of the selected food commodities (potatoes, wheat and sugar beet), grapes and fruit and our own production of the rapeseed oil.

We farm an area of more than 20 thousand hectares of the agricultural land in the regions of Vysočina, South Bohemia, Šumpersko, South and North Moravia. The sustainable land use as one of the basic production factors of the human society is our priority. We breed 15 thousand bovine animals and 60 thousand pigs.

FOOD INDUSTRY

Concerning the food industry, the AGROMĚŘÍN Group focuses on the processing of the basic commodities that are typical for the territory of the Czech Republic – meat and milk, potatoes, other vegetables and fruit and grapevine. In the production process we put emphasis on the high premium quality, traditional composition, safety and freshness of foodstuffs.

ANIMAL BREEDING

The goal of the animal breeding is to guarantee a good service in the area of cattle and pig breeding for the livestock farmers. Our priority is monitoring of utility characteristics according to the existing laws, insemination, production and sale of the doses of insemination from the domestic breeding and import of the world's top genetics. In the field of breeding we successfully cooperate with the best breed societies in the Europe, but also overseas. Among the breeding services, we also specialize in the cattle trade and in the sale of the chosen categories of the cattle from our own production.

RYNEK STORES

RYNEK stores create unmistakable and pleasant setting for a new shopping style of high quality Czech food made with ingredients produced in the Czech Republic. The basic range of products of RYNEK stores is fresh pork, beef and chicken meat, sausages and meat products, traditionally made cheese and other dairy products, eggs, potato products, vegetable and fruit products, honey and Moravian vine. Most of the foodstuffs are from our own production.

OTHERS

Among the strategic activities, the AGROMĚŘÍN group is aimed at other activities, which are closely connected with agriculture or food industry and contribute to the stabilization of these sectors. We mean mainly propellants sale, oil and grease sale, agricultural machines sale and service, tire sale provided with the needed service, transport service, use of renewable source of energy and consecutive electricity sale.

We care about the Czech agriculture

Agricultural primary production is the basic activity of the AGROMĚŘÍN group. The meaning of the agriculture is the close connection between animal and plant production for us. We can guarantee a sustainability of a good environmental state of the soil and we prevent the soil from erosion with this approach. A wide geographic disintegration of the production enables us to use different climate and soil conditions for the diversification of the production and restriction of the dangers connected with the weather influence. The whole range of the produced agricultural commodities is designated for the processing into food stuffs in so called "closed group". Some of our home products with guaranteed origin and in the required quality are already provided for our customers.

	1 575 million CZK

The AGROMĚŘÍN group is one of those, who care about maintenance of the soil fertility, respect principles of the right agricultural praxis and welfare rules during the cattle farming. Our work is based on the specialization of production – the production is controlled by experts, our modern machines and technologies are manipulated only by experienced and trained workers. We prefer innovative access with the use of science and research discoveries in decision-making processes. 20 thousand hectares of the agricultural land, that was already mentioned, accounts for 13.6 thousand hectares of the arable land, which is being cultivated intensively and with the strong regard to permanent maintenance. A little less than 1 thousand hectares of arable land is being cultivated in the ecological mode. The rest of the land accounts for 5.5 thousand hectares permanent grass areas, 170 hectares of plantations and 120 hectares of vineyards. We have 5.5 thousand milk cows (mostly Holstein cattle) with daily production of 120 thousand liters of raw cow milk and 900 meat-cows Charolais in the conventional agricultural mode and ecological agricultural mode. Bulls fattening within the intensive farming makes up production of 1.4 thousand pieces. We contribute to the pigs farming maintenance in the Czech Republic. The basic drove of pigs accounts for over 5.5 thousand sows, we have almost 30 thousand pigs in the fattening.

AGRO – Měřín, a.s.

The AGRO – Měřín, a.s. company is one of the most important companies in the agriculture of the Czech Republic aimed at the dairy cattle farming, mostly Holstein race. We cultivate almost 10 thousand hectares of the agricultural land in the Vysocina region and southern Moravia. We grow grain on 3 400 hectares, rape plant on 930 hectares, corn (both grain and silage) on 2 050 hectares and consumer potatoes on 275 hectares. The rest of the arable land serves for fodder crop growing. The basic herd of milk cows makes up 3 thousand pieces. We are also engaged in the pigs farming and our current basic drove has 750 pieces of sows. From our other agricultural activities the production of feeding mixtures and production of the rape oil can be named.

AGROFARM, a.s.

The AGROFARM, a.s. company is highly specialized in the pigs farming. We are engaged in piglet, slaughter-pigs, breeding and pedigree sows farming and selling. You can find our farms in the Vysocina region. The basic drove makes up almost 5 thousand sows; we have 17 thousand pieces in the category of 7–25 kg pigs and 23 thousand pigs in the fattening.

Frýdlantská zemědělská a.s.

This company is aimed at animal and plant production in the foothills of Beskydy. The main activity is Holstein cattle farming and raw

cow milk production. The company manages 1 458 hectares of the agricultural land with the goal of having ensured feed-base for the animal production. We grow wheat, barley, corn, rape and fodder crop on 650 hectares of the arable land. The rest of the land accounts for grass areas. The basic milk cow herd makes up 520 pieces.

LANDŠTEJN s.r.o.

The LANDŠTEJN s.r.o. company is aimed at meat cattle farming without market milk production at the grazing in the border area of the southern Bohemia. The company owns 1 280 hectares of the agricultural land. Grains and rape are grown there. The basic meat cattle herd makes up 365 cows.

NOVÉ VINAŘSTVÍ, a.s.

The NOVÉ VINAŘSTVÍ, a.s. company grows its grapevine on four vineyards and in fourteen varieties (Rhine Riesling, Walriesling, Green Veltriner, Chardonnay, Pinot Blanc, Pinot Gris, Pinot Noir, Sauvignon, Red Traminer, Muskat Ottonel, Neuburk, Cabernet Sauvignon, Frankovka and Svatovavrinecke). The oldest vineyard is Neuburk at the Knížecí vyhlídka, which was planted in the 80ies of the last century. On the contrary, the youngest vineyard is Sibenicni vrch, where only Rhine Riesling planted in 2011 is being grown.

POMONA Těšetice a.s.

The POMONA Těšetice a.s. company runs the farm in the southern Moravia in the corn area of “Dyjsko-svratecky” ravine in good soil conditions on 2 100 hectares of the agricultural land since 1998. The plant production part grows on 1 500 hectares market crops – barley, wheat, rape, pea plant, corn and is also feed-base for animal production part. We have about 520 dairy cows (Holstein race) at the Purkrábka farm. The essential part of our agricultural production is fruit farming at Těšetické plantations, which have long-time tradition. Important is the production of apricots, peaches and apples.

I. Podzvičinská a.s.

The I. Podzvičinská a.s. company is aimed at meat cattle farming without market milk production at the grazing in the the foothills of the Giant Mountains. The company manages 900 hectares of the agricultural land. Grains and silage corn are grown there. The basic meat cattle herd makes up 200 cows.

Ústav pro strukturální politiku v zemědělství, a.s.

This company specializes in agricultural production in the ecological agriculture mode with dairy cows farming, but also cows without market production of milk. The whole production is certificated by KEZ o.p.s. Chrudim and has a status of “ecological product”. The company manages 2 445 hectares of agricultural land, 887 hectares from the whole accounts for arable land, which feeding products and also

little amount of pumpkin is being grown at. The basic dairy cows herd makes up 500 pieces of red-spotted cattle and 100 pieces of Holstein cattle. The basic meat-cows herd makes up 320 cows of Charolais race.

Zemědělské družstvo Nechanice

This cooperative farm manages 2 184 hectares of the agricultural land to the west of the city Hradec Králové. Among principal animal production aimed at the dairy cows farming (Holstein) and pigs farming in the fattening selected market crops growing is also important. On the arable land of about 1 917 hectares we grow mainly feed-grain, but also rape and sugar beet. The basic dairy cows herd makes up 365 pieces, the capacity of the pigs fattening is 1 400 places.

Zemědělské družstvo Světnov

This cooperative farm is a good representative of standard agricultural primary production in the rough conditions of the Vysočina region. We specialize in animal and plant production. The Zemědělské družstvo Světnov manages 1 093 hectares of the agricultural land to the west of the town Zdar nad Sazavou 580 m high above sea level. We grow feeding crops and rape. Within the animal production we have dairy cattle of Holstein race. The basic herd makes up 460 cows.

Foodstuff from the Czech Republic

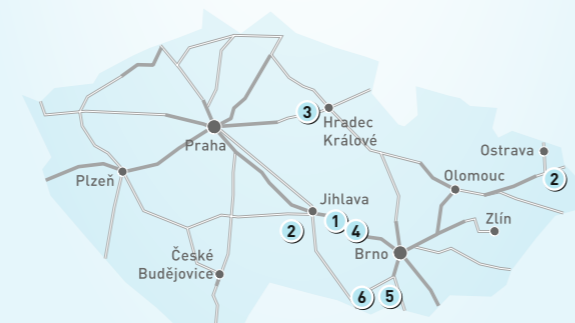

At AGROMĚŘÍN, our primary objective is to produce premium quality food. Most of the primary raw material is produced in the Czech Republic, especially in agricultural firms of the AGROMĚŘÍN group. Thanks to this interconnection of the production vertical safe and fresh food of domestic origin with the traditional ingredients could be produced. The goal of our food industry is to support food self-sufficiency of the Czech Republic.

At our processing plan, we process 13,500 heads of beef and 25,000 pigs each year. The production of the beef is also possible in BIO quality. Cow milk processing is concentrated in the Vysočina region and the current annual volume of its production is 47 million liters. Early varieties of potatoes from the southern Moravia and late variety potatoes from the Vysočina region and foothills of Beskydy are heading into to modern storehouses. We process annual over 13 thousand tons of potatoes and 2.5 thousand tons of other vegetable. The part from 3.2 thousand tons of fruit which is grown in the area of Znojmo is designated for the production of fruit juices. We also process 260 tons of bunches of grapes for the wine production in the southern Moravia.

	1 610 million CZK

AGRO – Měřín, obchodní společnost, s.r.o.

Meat-processing plant in Měřín traditionally process only domestic beef and pork, mostly from the AGROMĚŘÍN cattle farming. As the essential part of the production is considered cut beef and pork and meat products in the product range beginning with the common ones, which you could find on the counters of every butchery, ending with the local specialties. Among the products with national quality mark of the food KLASA you can find also gluten-free products in our offer. High-quality meat products and the domestic cut meat are offered to our customers through our own shop-concept RYNEK or through the smaller regional chains.

Beskyd Fryčovice, a.s.

The Beskyd Fryčovice, a.s. company is well-known on the Czech food market for its long-term tradition. Thanks to the high quality of the primary raw material (mostly from the own production) and its processing, based on the modern technologies, the company has built up a significant position. A good proof for the quality guarantee is the whole line of gained certificates, norms of quality and awards for the quality of the single products. Also thanks to this, the company is today the key supplier for important both domestic and supranational gastronomic firms and business chains.

The traditional range of products includes packaged potatoes, peeled raw and cooked potatoes, potato products, dumplings, one-type cooled vegetable and vegetable mixes, vegetable salads, vegetable juices and fresh herbs. As the other business activities wholesale store could be named, which is a good complement for the whole range of products in the field of gastronomy.

CHOVSERVIS a.s.

TORO Hlavečnick is known for its smoked specialties of the traditional technologies production. The range of products is wide, from the soft sausages, over the smoked meat to the traditional Prague ham TORO. Products from TORO Hlavečnick gained (among the others) the award on the exhibition in Dijon, France or at the trade fair Grüne Woche in Berlin. The quality of our production was awarded in the year 2001, when we gained the national quality mark KLASA. Another very important business sector is a slaughterhouse run. Our specialization is a slaughter of the high quality young bulls, whose meat could be found on the counters of our important business chains.

LACRUM Velké Meziříčí, s.r.o.

The dairy LACRUM Velké Meziříčí is the typical representative of the regional processor of the raw cow milk. Its future is built up on the maintenance of the quality of its favorite products and the range-products widening with required news.

The Dutch cheese in the different make-ups – Eidam cheese 20, 30 and 45% of the fat in the dry matter, as well as butter freshly made by churning know both the home and foreign customers. Eidam cheese in the form of horseshoe or sliced portion are favorite mostly because of its specific taste given by the traditional production procedure. LACRUM produces also cream cheese, cottage, consumer milk in the bottles, cream 40 % and creamy starter for the complementation of the offer.

NOVÉ VINAŘSTVÍ, a.s.

In the NOVÉ VINAŘSTVÍ we produce mostly white and rose wine only with the screw or glass cap. The exception, that proves the rule, is red wine Pinot noir with the cork cap. The NOVÉ VINAŘSTVÍ was the first one that has begun with these modern wine caps. The glass caps, made by the Czech producer of bijouterie Preciosa, were used by the NOVÉ VINAŘSTVÍ up to the year 2013 as the only one in the Czech Republic! In the NOVÉ VINAŘSTVÍ everything is being done innovatively, better and differently. The wines of the NOVÉ VINAŘSTVÍ regularly collect awards on the internal, but also prestigious foreign shows (Decanter world wine award, Concours mondial de Bruxelles, Berliner Wein Trophy). The NOVÉ VINAŘSTVÍ one of the finalists of the prestigious competition Winemaker of the year 2013. The NOVÉ VINAŘSTVÍ also gained in the year 2007 “The Good design award” and “The award for the manager act in the design sphere” for the design of the cover and these were awarded by the Design center of the Czech Republic and The Ministry of Industry and Trade of the Czech Republic.

POMONA Těšetice a.s.

POMONA Těšetice a.s. processes fruit, which is grown in our own plantations in the area of Znojmo. Our fruit plantations in the area of 5 hectares are annually being restored. Because of this long-term production of modern fruit sorts is guaranteed. We are able to produce a sufficient regular amount of our high quality honey for the RYNEK store customers from our 150 own bee colonies. We are a part of the Pomological union of the Czech Republic and our fruit could be sold under the protect mark “being grown in the system of the integrated production”. We supply our stores with sour cherries, apricots, peaches, apples, plums and bunches of grapes of this quality. We also produce tasteful fruit juices from the selected sorts of fruit since 2013.

7

The high quality for breeders

Our priority in the area of cattle and pigs breeding is to guarantee high quality products for breeders in the Czech Republic. These products enable rising of the efficiency of their herds. It is not about raising animal productivity, the goal is improvement of health and reproductive indicators, rising of the final product's quality (meat, milk) and among breeding animals rising of their productive life optimization. Our knowledge and experience are transmitted also in the cattle trade. We sell regularly selected cattle categories from our own production – the most required are heifers in calf.

With regard to required specialty breeding activities are set aside into specialized sections in AGRO–Měříň, a.s. and CHOVSERVIS a.s. companies, which specialize not only in cattle breeding, but also in pig's breeding. Cattle breeding activities are then developed in specialized companies GENSEMEX, a.s. and PLEMO, a.s.

8

	<ol style="list-style-type: none"> 1 AGRO – Měříň, a.s. 2 GENSEMEX, a.s. 3 CHOVSERVIS a.s. 4 PLEMO, a.s.
	114 employees
	227 million CZK

AGRO – Měříň, a.s.

Cattle and pigs breeding is one of the basic activities since the birth of this company. The company owns station of insemination for boars in Velké Meziříčí and station of insemination for bulls in Litoňov, which is fully used by the PLEMO, a.s. company. What cattle breeding concerns cooperation with companies GENSEMEX, a.s. and PLEMO, a.s. is included. Breeding service is aimed at doses of insemination of cattle and pigs selling, copulation plans processing, cattle insemination and early diagnosis of cattle and pigs pregnancy, checking of utility properties of cattle and pigs and animal trade.

GENSEMEX, a.s.

The GENSEMEX, a.s. company was created in 1997 together with its Canadian partner THE SEMEX ALLIANCE, which is one of the biggest and most progressive breeding companies in the world. The company specializes in doses of insemination import (Holstein race), or else embryos from Canada and USA. Imported sperm belongs to the TOP quality, because offered bulls are at the top chart of breeding figures in the exact country. There are not only tested bulls in the offers, that already have progeny in the exact country, but also young bulls with high predicted breeding figures. Recently, also high quality doses of insemination of meat cattle are imported because of breeder's interest.

CHOVSERVIS a.s.

The CHOVSERVIS a.s. company is also engaged for more than 20 years in breeding. Doses of insemination selling of cattle and

pigs, copulation plans processing, cattle insemination and early diagnosis of cattle and pigs pregnancy, checking of utility properties of cattle and pigs and animal trade are the basic activities of the breeding division. What cattle breeding concerns, cooperation with companies GENSEMEX, a.s. and PLEMO, a.s. is included. There are two stations of insemination for boars in service in Brno and Kouty na Šumavě for doses of insemination production in pigs breeding. The studs in the area of East, Middle, North and West Bohemia are supplied with produced boars doses of insemination according to current orders.

PLEMO, a.s.

The PLEMO, a.s. company was created in 2000 and is aimed at breeding cattle farming, production and selling of doses of insemination and marketing in the cattle breeding area. Bought breeding bulls are stabled at the insemination station for bulls in Litoňov, where the separate breeding room for young breeding bulls was opened at the same time. There is also a central store with doses of insemination at this station. Apart from our own production of doses of insemination, our company also imports doses of insemination from abroad – Fleckvieh race doses of insemination from Germany, Austria and France and Holstein race doses of insemination from France.

9

Quality food

The first shopping store in this new concept was opened in 2013. The goal of RYNEK concept is to extend these stores into the cities in the whole Czech Republic and thereby enable the consumers to buy high quality home products.

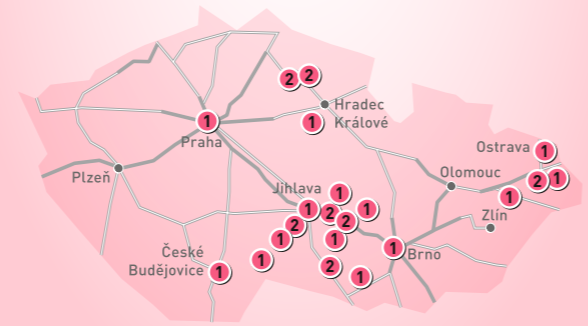

^ RYNEK store in České Budějovice
< RYNEK store in Ostrava

Selling concept RYNEK is based purely on the Czech capital. RYNEK stores create unmistakable and pleasant setting for a new shopping style of high quality Czech food made with ingredients produced in the Czech Republic.

The basic range of products of RYNEK stores is fresh pork, beef and chicken meat, sausages and meat products, traditionally made cheese and other dairy products, eggs, potato products, vegetable and fruit products, fresh fruit, honey and Moravian vine. Most of products is from the own production of companies belonging to the AGROMĚŘÍN group.

	<p>1 RYNEK stores Brno, Bystřice nad Pernštejnem, České Budějovice, Havířov, Hlavenčín, Jihlava, Jindřichův Hradec, Kopřivnice, Ostrava, Praha, Těšetice, Třebíč, Třešť, Žďár nad Sázavou</p>

	120 million CZK

Everything goes better with us

Among the strategic activities the AGROMĚŘÍN group is aimed at other activities, which are closely connected with agriculture or food industry and contribute to the stabilization of these sectors. We mean mainly propellants sale, oil and grease sale, agricultural machines sale and service, tire sale and providing needed service, transport service, use of renewable source of energy and consecutive electricity sale.

PET and FARM supplies

PROFARM – everything that you need for your farm...

is a shop, which specializes in pet and farm supplies. It was set up under the CHOVSERVIS a.s. company in 2001. Thereby was broadened the current complex service offer for agricultural companies and farmers, who are interested in animal production. The whole products and distribution range is being developed the whole time and you can find it currently in the catalog on the www.profarm.eu webpage. Since 2004 there are also riding supplies in our offer. Currently, PROFARM also sells hobby programs for small and hobby animals farmers. We distribute our complete range of products in the whole Czech Republic and our customers are getting used to our internet sale.

Renewable resources

Environment-friendly attitude is one of important things for AGROMĚŘÍN group and therefore it is aimed at the energy production from renewable resources, it means natural energetic resources, which are fully or partly capable of regeneration. Mainly sun, wind and water energy and also so called biomass are included.

Three biogas stations (the total electricity output – 2,400 MWeI) and one photovoltaic power station (the installed output – 0.599 MWeI) have been built up. The annual electricity production from these renewable energetic resources accounts for 20 000 MWh and so it covers electricity consumption of the whole AGROMĚŘÍN group.

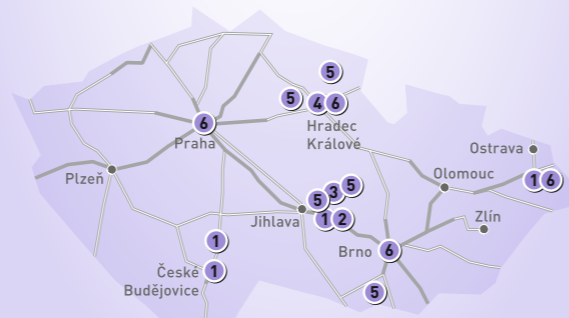

Transport service

Quick and effective transport of freshly made food stuffs straight to the customer is our goal. You can find AGROMĚŘÍN group food stuffs everywhere you expect it (for example in retail sale chains and wholesale chains, in restaurants and gastronomic facilities) thanks to the own distribution system of refrigerated products.

Transport services are carried out by Beskyd Fryčovice, a.s. company, which is well equipped with its own road transport with central distribution store in Fryčovice and distribution centers in Brno, Hradec Králové and Praha. What local distribution concerns we cooperate with external hauliers. However, the refrigerator chain (up to 5°C) is always being superintended. The customers over the whole Czech Republic and also in Slovakia and Austria are three times in week provided with our goods.

	63 employees
	507 million CZK

Propellants, oil and grease

We offer all the oil and grease types and propellants distribution including running of the petrol station in Měřín. The sale is possible in Měřín, České Budějovice, Tábor and Fryčovice. We use three car-cisterns (31 000 liters, 8 000 liters and 5 000 liters) for the propellants delivery. So we can satisfy our customers' needs for the propellants distribution not only in gradient areas of every single center. What oils and grease concerns all the basic types of oils in free-poured form are in our offer and thereby we address a big group of our customers with very interesting prices. The oils in original packing of well-known trademarks are another part of our offer, mostly MOL, Shell, Castrol and BP.

Agricultural machines sale and service

Agricultural machines sale and service is mostly accessible for the subjects of AGROMĚŘÍN group.

Tyre-service

Car service center Žďár nad Sázavou offers motorists service in the area of tire-service and car repairs. One of the major activities is all tiring types sale under the terms of the franchise relationship with Conti Trade Services s.r.o. company in the service system BEST DRIVE. There are trained professionals, who are willing to provide customers with services included in the geometry checking and setting, air-conditioning service and repairs with tire-thermo press. There are also other offered services – seasonal tires storage and tire insurance. We are also willing to broaden our service and because of this there are also car and motor truck repairs, tractor and construction machinery repairs possible and you can find vehicle diagnosis in our offer, too.
